

HEBANON

BASILE - 1830

FOR THE CREATORS,
WHO SHAPE THEIR
OWN WORLD.
FOR THE VISIONARIES,
WHO SEE THE WORLD
THROUGH DIFFERENT EYES.
FOR THOSE WHO PLAY THEIR
OWN MUSIC AND
WANT EVERYTHING TO HAVE
ITS OWN RHYTHM.
HEBANON IS DESIGN
FOR THOSE WHO
REFUSE TO CONFORM
AND FOR THOSE WHO
STAND OUT.

At Hebanon Basile – 1830, we transform the force of nature into forms built to last.
We give shape to the contemporary, creating iconic, authentic, timeless objects by reinterpreting the ancient
Italian, French, and Eastern arts of woodworking, metalworking, and stone carving.
Our roots run deep into history — from the Bourbon court to collaborations with the Archaeological Park of Herculaneum and the San Carlo Theater of Naples — guided by our family motto: Spiritus intus alit, the spirit that dwells within nourishes and gives life to all things.
We use selected, formaldehyde-free woods, certified under international forestry regulations and CITES — because true beauty must also be healthy, long-lasting, and respectful of the earth that produces it.
Hebanon's pencil brings to life collections of kitchens, furniture, upholstery, and accessories designed to be lived with over time — a sensory journey of shapes, colors, sounds, textures, and scents; a journey that begins in our Caveau, home to centuries-old wood species, rare varieties, and one-of-a-kind genetic anomalies.
Alongside our design production, we develop integrated, modular, and made-to-measure architectural solutions — doors, wall paneling, walk-in closets, and complex systems — capable of turning any space into a statement of authenticity, comfort, and inclusivity.

We also work in the Contract sector, serving for high-end residential, directional offices, yacht and superyacht, fine dinings, and hospitality projects.supporting private clients, architects, designers, and developers in the realization of complex projects.
An integrated approach that combines design, engineering, and in-house production with a well-established network of specialized partners guarantees execution quality, reliability, and lasting continuity. Every project is created to engage with the identity of the people who live in it, making each space unique, welcoming, and memorable.
Choosing Hebanon Basile – 1830 means bringing into a space not just a functional object, but an authentic fragment of beauty meant to last — like all things that are real.

HEBANON. SHAPE YOUR WORLD

MINDSET

Hebanon brings to life a sensory universe of contrasts, shapes, textures, and scents.
Rooted in the tradition of the Kingdom of the Two Sicilies, amid the atmosphere of Pompeii and Herculaneum, we explore nature and the arts to create inspired, functional designs.
Guided by slow design, we craft furniture that nurtures identity, well-being, and harmony, generating a virtuous cycle of beauty and research.
The pillars of our work are:

HUMAN ORIENTED RESEARCH

Our vocation is to improve people's lives. Our R&D department, in collaboration with several universities, develops solutions that integrate ergonomics, inclusion, and smart technologies, with attention to living needs and to differing abilities.

We interpret people's desires and diverse cultural identities, restoring centrality to the authentic value of things and creating environments in which to live the present with serenity and imagine the future in harmony.

DESIGN

For Hebanon, design is a paradigm of thought — a method that unites culture, function, and aesthetics. We seek balance among proportions, materials, colors, and volumes, because we believe elegance is born from a design intelligence capable of giving order and meaning to spaces, expressing the voice of those who refuse to conform and want to stand out.
Our design is the result of integrated research into material, form, color, ergonomics, and technique, nourished by a critical vision of contemporary living.
We create authentic and timeless objects — small architectures for life, conceived to endure, to generate wellbeing, to be lived with, and, at times, to surprise.

AVANGUARDIA

For us, being avant-garde means harmonizing art, technology, and experimental research.
The mastery of our cabinetmakers converses with advanced technology and with industrialized, sustainable processes, transforming the strength of nature into timeless furnishings.
We reduce waste and production times, ensuring technical excellence, long-lasting performance, and solutions that enhance the usability of spaces — also investing in patents to advance our innovations.
We believe in a vision of design that continues to evolve, experiment, and innovate, defined by impeccable craftsmanship built to endure.

DESIGN IS NOT JUST ABOUT AESTHETICS — IT IS AN ACT OF CIVIC RESPONSIBILITY

NATURAL MOOD

Zero Formaldehyde, Pure Air
We use formaldehyde-free materials, safeguarding health and enhancing the quality of living — a language that speaks to people before it speaks to the eye.

Certified Materials, Longer Life
FSC-certified woods, low-VOC or fully natural finishes, formaldehyde-free adhesives, and technological innovation combined with artisanal savoir faire: pieces conceived to last for decades, telling a story that resists obsolescence.
All products are fire-branded and identified by a unique serial number to guarantee authenticity and recognition worldwide.

Minimal Footprint, Maximum Transparency
We select only suppliers who share our ethical principles and meet our quality standards.
From continuous investment in systems that enable the use of renewable energy to reduce CO2 emissions and waste, to comprehensive documentation on VOC content and safety, we minimize our environmental impact while reinforcing trust at every stage.

CIVIC COMMITMENT

Being Hebanon means believing that design can improve people's lives and regenerate territories through culture, education, and beauty.
We support the education of young designers in partnership with IUAD, the University of Naples Federico II, and the University of Campania Luigi Vanvitelli, promoting scholarships and research programs dedicated to inclusive and sustainable design.
We foster a culture of design through initiatives such as Salerno Design Week and Hebanon Meets — platforms for dialogue among companies, professionals, universities, and communities — aimed at promoting a gentle, responsible, and conscious vision of design.
We have overseen the restoration of the historic seating of the Teatro San Carlo in Naples and collaborate with the Archaeological Park of Herculaneum, helping to preserve beauty and memory in places that embody our cultural heritage.
We believe in slow design as a cultural and civic act: every gesture, every project, every piece of furniture becomes a way to preserve knowledge, generate value, and share beauty.

FEMALE DESIGN COUNCIL NEW YORK

OUR PARTNERS

A shared commitment to innovation, the ongoing pursuit of new solutions, care for people and the environment, and the search for excellence and uniqueness gave rise to the direct partnership between Hebanon Basile – 1830 and:

We collaborate directly with:

Industrial partnerships developed with:

OUR ORIGINS

Ascanio Basile, a native of the Kingdom of the Two Sicilies and a descendant of one of its oldest families, began his career as an apprentice. His innate curiosity and thirst for knowledge soon set him apart, leading him to help build the carriages for the Naples–Portici railway — the pride of its time and a symbol of modernity.
Fascinated by the art of cabinetmaking, Ascanio absorbed its secrets from the most renowned Neapolitan and French masters, blending the rigor of tradition with a refined, personal vision.
Driven by this creative impulse, he set out to craft a special bedroom for his fiancée — a gesture that embodied both passion and craftsmanship. Yet fate had other plans: growing demand from local noble families, the Neapolitan aristocracy, and even the Bourbon royal household drew him entirely into his art.
From this prophetic union of talent and dedication was born a lineage of cabinetmakers, bound by a common thread of passion and expertise. Generation after generation, they have preserved the very essence of the craft, guided by a motto as simple as it is profound: `SPIRITUS INTUS ALIT` — the spirit within nourishes and gives life to all things. It is this very spirit that moves the hands, the heart, and the mind, transforming raw material into timeless works where soul and matter intertwine, giving rise to creations that tell stories, evoke emotions, and embody true craftsmanship.

Objects from the 19th century belonging to our corporate museum, exhibited by the Herculaneum Archaeological Park in the exhibition "MATERIA: The Wood That Did Not Burn in Herculaneum." Photo by Luigi Spina.

THE XYLOTHEQUE

50 wood species, 25 centuries-old, 7 rare, and 2 that are the result of "anomalies" — small evolutionary quirks of the species. This is the beating heart of Hebanon – Basile 1830.
Our xylotheque gathers rare, centuries-old, and highly prized woods from Brazil, India, Europe, Africa, Lebanon, Asia Minor, New Zealand, and the Americas.

Wood has great narrative power: it can tell a story, speak of a person, or even describe the movement of a leaf brushed by the wind. It allows itself to be shaped by different hands and minds, giving rise to simple, modular forms, and, thanks to its living nature, makes every object unique. Textures and colors that speak of geographies near and far, the purity of the material and the purity of form, together with the ancient techniques of Italian, French, and Oriental cabinetmaking, reinterpreted in a modern and contemporary key, tell not only a way of life but stories — a way of being to recognize oneself in, objects to become attached to.

HEBANON

IS

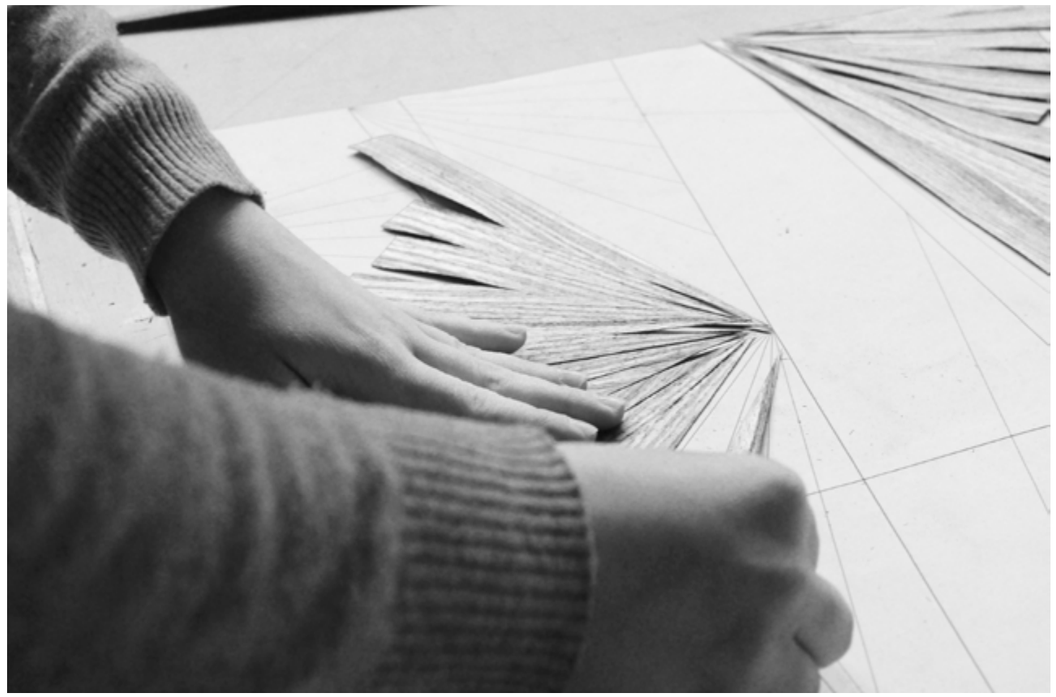

LIVING

WOOD

Wood has great narrative power.
It allows itself to be shaped by different hands and minds, gives rise to new forms, and makes every object unique thanks to its living nature.
From wood is born Hebanon's research, nourished by past, present, and future.
Maria, Giovanna, and Nicola Basile, the fifth generation at the helm of the design company, embody this research: three distinct personalities united by a single vision and a heritage rooted in art and design. With them was born the product design studio, Basile Studio.
Hebanon evokes our origins and explores nature and the arts to give shape to inspired, functional designs. A deep knowledge of the secrets of wood, natural stone, and metal, combined with skilled craftsmanship, merges with ideas to express itself through a timeless style.

Hebanon is a land of disciplined visionaries who have chosen to put themselves at the service of well-being, designing objects with a heart, a soul, and a brain.
Guided by the principles of slow design, we create furnishings through which to reclaim one's own identity — pieces that stimulate contentment and well-being and generate a circular process of research and the production of beauty.
In Hebanon's forge, pattern, inlay, and carving become the core elements of a simple language capable of making an inner world visible: a fascinating sensory universe marked by contrasts of color and form, tactile perceptions, and the scent of wood.

Our long experience and the expertise developed across five generations let us create what others cannot — design
projects that are unique, unrepeatable, seductive, and multisensory.
With a 10,000-square-meter (roughly 108,000-square-foot) facility housing more than 100 machines and
installations for working wood, metal, and stone, one project manager per contract, and one technician for every
four operators, we're able to manage residential contract work and large-scale projects for five-star-and-above
hospitality, yachts, and superyachts, all on schedule.
Our technical and design savoir faire, our on-site management and organizational expertise, and our multidisciplinary skill set make Hebanon a single, reliable partner for high-standing projects.

THE HEBANON HOME

The Hebanon home is a sunny, intimate house, constantly evolving.
Minimalism and decoration exist in dynamic balance, adapting to the vision of those who will inhabit it.
The design composition is made of dualities, because we don’t see a black-and-white world — we read a world in color, made of countless shades.
A play of balance between aesthetics and function, of alternating solids and voids, of shapes and colors, of elements rooted in the land alongside more exotic ones, anthropomorphized natural forms and dreamlike figures — these distinguish Hebanon’s design from other international furniture companies.

Our compositional language recalls our origins in the Kingdom of the Two Sicilies, the Bourbons, and the influences of our region’s ancient Greek and Roman heritage between Pompeii and Herculaneum, and is shaped by the Eastern notes of Japan and China; it explores nature and the arts to give form to inspired, functional designs.

Two elements define our design language:

INLAY WITH NARRATIVE

Inlay gives objects a profound narrative value, stimulating optical illusions that slide toward sensual, sometimes elusive perceptions. Patterns feed on emotional tension, letting us construct an everyday world made of intuitive elements and geometric textures inspired by nature: the artifice of art in dialogue with nature.

A NEW CARVING’S CONCEPT

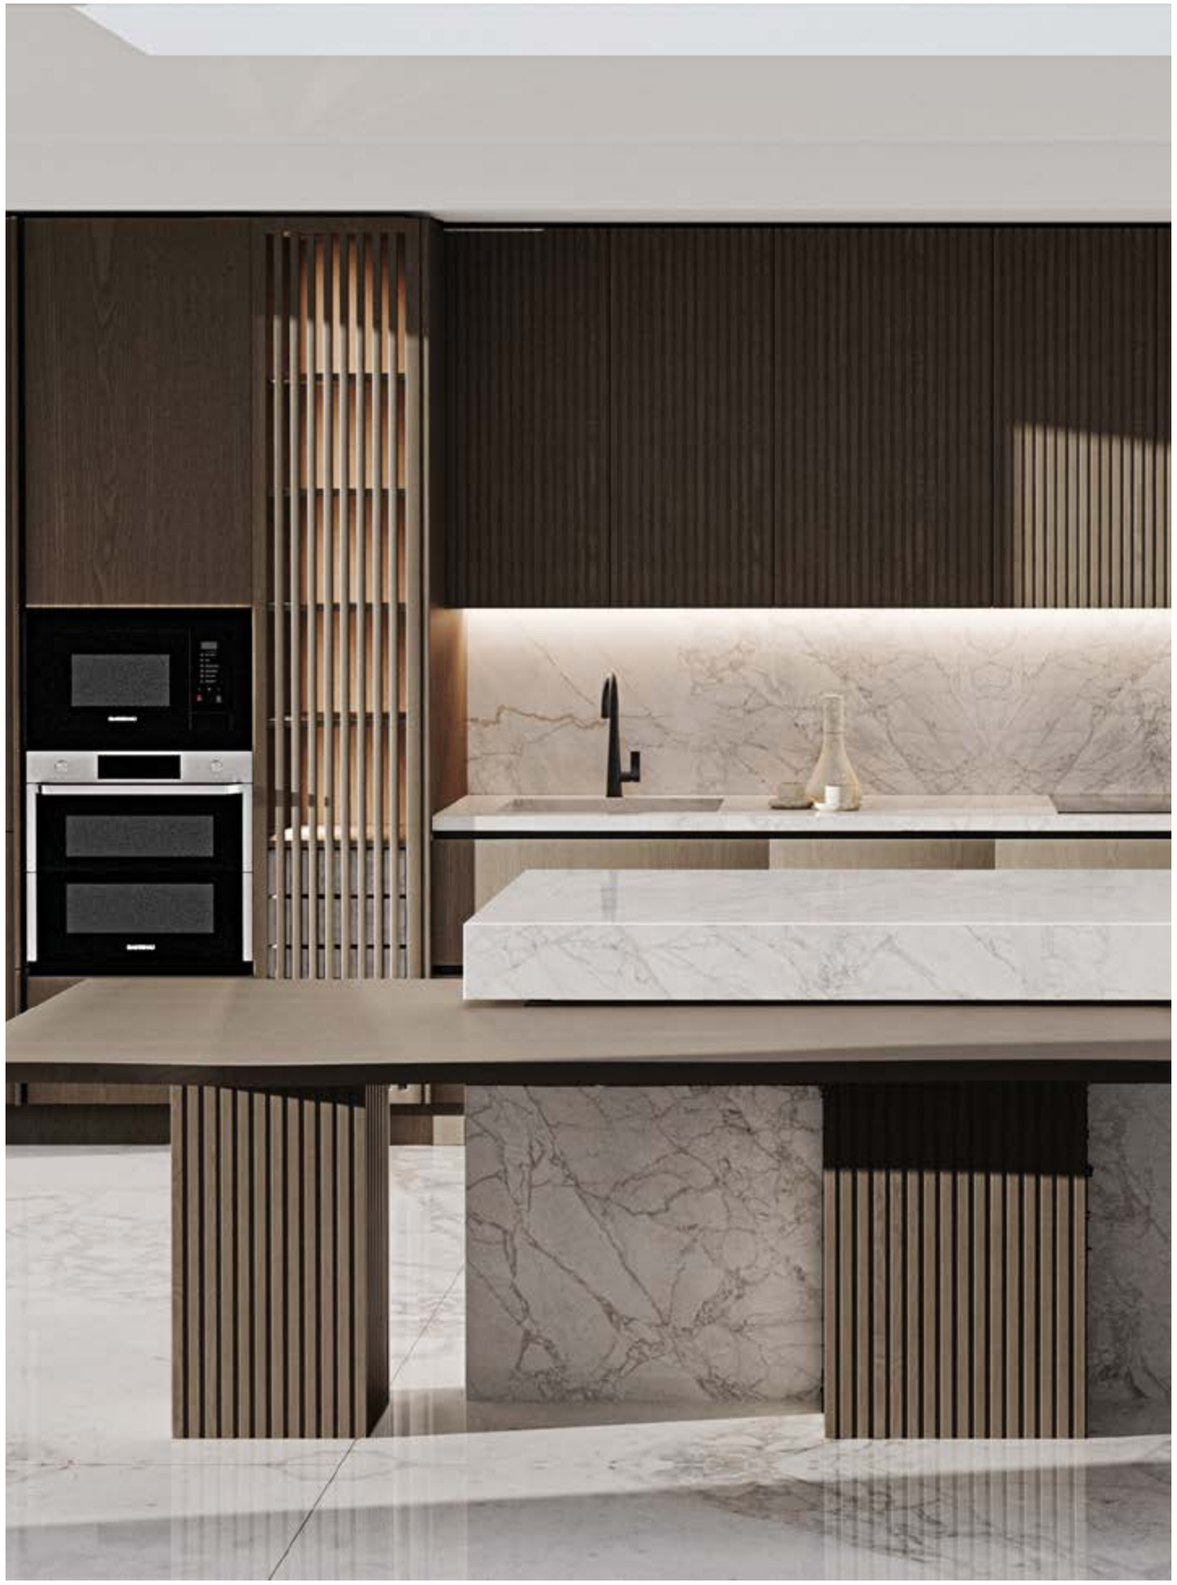

Carving sculpts the air, defining the rhythm of space. Its most fascinating trait is its tendency to emphasize the contrast between opposing elements — masculine and feminine, hot and cold, pure and primary forms, elements near and far, and, at times, the organic forms of nature.

THE HEBANON KITCHEN PHILOSOPHY

For more than 80 years, we've been designing, developing, and producing kitchens and integrated architectural solutions.
Our integrated design vision, combined with the ability to bring it to life through in-house development and production — together with ongoing dialogue with the leading Italian and international design studios — has let us hone our skills in crafting solutions for a wide range of spaces and personal needs, from compact urban dwellings to grand villas and entire residential complexes.

The Hebanon kitchen isn't just a functional space — it's a canvas for creativity. Our space-saving designs and cutting-edge technological automation bring dynamic functionality to every corner, fostering an environment where creativity can flourish.
We prioritize people's well-being by crafting our furniture with formaldehyde-free materials, ensuring not only beautiful spaces but healthy ones.
Our design rests on a few key principles: spatial and product ergonomics; the use of wood and stone, elevated by the savoir faire of our master cabinetmakers; the most advanced technical solutions, both those already in use and those developed by our R&D department; all combined with clean, rhythmic lines that sculpt and adorn the space.
Our creations reflect a deep understanding of human needs, desires, and lifestyles. We first identify the main functional needs, then the finer details, seeking original architectural and aesthetic solutions carefully crafted and harmonized with the setting, the type and scale of the furnishings, and an analysis of traffic flow.
The kitchen is, above all, a workspace: correctly defining work methods and counter heights matters just as much as properly organizing usable interior space. That's why an integrated ergonomic study of space and product is essential. To this end, our consulting service supports the project 360 degrees — from the layout of the living spaces and the internal spaces of the units themselves, to the materials in relation to the structure, interior fittings, countertops and backsplashes, accessories, and appliances — delivering a complete product with a pre-assembly service.

DESIGNING AN ERGONOMIC ENVIRONMENT MEANS BUILDING A CONVIVIAL SPACE WHERE YOU TRULY FEEL AT HOME.

ONE TO ONE SERVICE

Ergonomics lies at the heart of our design philosophy. Our creations are born from a humanistic observation of how people interact with their environment. Our ongoing commitment to improving people's lives has driven us to develop increasingly personalized accessories and technological solutions designed to meet different needs of space, aesthetics, and functionality — including ad hoc solutions for people with different abilities, for a home that is more inclusive, comfortable, and beautiful for years to come.
In the modern home, the kitchen isn't just a place to cook — it's a multifunctional workspace. That's why we pay close attention to every detail, from layout and organization to ergonomics, ensuring that every Hebanon kitchen is not just a space to inhabit, but a space to thrive in.

The difference between a high-end industrial kitchen and a Hebanon kitchen lies not only in the wow effect or the perfection of its finishes, but in the one-to-one design consultation that ensures an ergonomic, functional, and fully personalized space.
From the very first stage, we offer 3D modeling and photorealistic renderings featuring all our finishes in wood, metal, and stone, so the project can be visualized before production begins.
This process leads to a detailed quote and, once confirmed, we provide technical drawings, production development, and guaranteed delivery times.
On request, our turnkey service also includes on-site measurements and installation, ensuring a flawless result — from concept to completion.

OUR SEATING IS DESIGNED TO ENSURE MAXIMUM COMFORT OVER TIME

Every detail of our design is carefully considered to ensure not just comfort, but a truly relaxing experience tailored to your needs and how long you'll be seated. Our modular sofas are crafted to adapt seamlessly to your spatial and postural needs, providing a perfect fit for every situation.
The seat's composition, depth, height, and incline are calibrated to promote a natural sitting position that supports the back and eases strain on the spine over time.

We pay special attention to the chaise longue module, carefully designed to contour to your body's natural shape, ensuring even weight distribution and minimizing pressure points. Its length and angle are calibrated to allow full leg extension and optimal spinal alignment while you unwind.
Our commitment to quality shines through in the choice of premium materials and the careful selection of padding. Every element is chosen to enhance your comfort and provide the support you deserve.
Our fabrics are soft to the touch and breathable, reducing the risk of overheating and moisture buildup, and preventing the development of mold.
Finally, our range of finishes and customizable configurations ensures your sofa blends seamlessly into any space, making it uniquely yours and maximizing its adaptability to any kind of indoor or outdoor setting.

OUTDOOR

Our outdoor collections reflect the savoir faire that sets us apart, while meeting the technical and functional requirements of the varied climate and environmental conditions they’re designed for.

ART DESIGN

Unique pieces or limited, numbered editions – sculptural and figurative creations crafted from precious woods, cast metals, and rare stones.

These exclusive collections are conceived for art galleries and collectors worldwide.

CONTRACT

We provide worldwide delivery together with professional installation and assembly services at any location.
Contract supply for high-end residential, directional offices, yacht and superyacht, fine dinings, and hospitality projects.
Our team provides continuous design support throughout every stage — from concept development to final implementation — assisting both architectural practices and industry companies.

SERVICES

DESIGN & DEVELOPMENT SUPPORT

- Initial consultation with the client to define needs, stylistic direction, and functional requirements; preparation of design concepts establishing the project's aesthetic vision.
- Preliminary renderings to evaluate spatial proportions and functional layouts, including proposed material selections.
- Ghost design services.
Engineering development and rapid prototyping.
- Advanced 3D modeling and CNC digital fabrication.
- Photorealistic visualizations.
- Preparation of technical drawings for production.
- Lighting design.

LOGISTICS AND CONCIERGE SERVICES

We provide worldwide delivery together with professional installation and assembly services at any location.
- Dedicated domestic and international transport services with full-risk insurance coverage.
- Protective packaging in palletizable OSB crates for safe shipment, equipped with SHOCKWATCH impact indicators to monitor shocks and ensure maximum protection throughout handling and transit.
- Extended warranty programs, maintenance contracts, and dedicated after-sales support.

ENGINEERING, PROJECT EXECUTION, AND ON-SITE SUPPORT

- On-site surveys and detailed measurements.
- Professional assembly and installation with full liability insurance. *
- Site management for our scope of work, with coordination support for other contractors.
- Bespoke manufacturing, materials, and custom color development according to NCS or RAL standards.
- Project Management
- Conservation and restoration work.
- Development of innovative techniques and finishes that combine traditional craftsmanship with advanced materials.

PRODUCTS

Our team provides continuous support throughout every phase, from concept to completion, responding to the specific needs of each client in Italy and abroad. What we can provide:
- Complete kitchen systems, including countertops and wall claddings, with metal or ceramic fronts.
- Interior doors in wood, glass, or aluminum-framed glass, integrated with wall paneling and partition walls.
- Equipped desks and custom office furniture.
- Wardrobes and walk-in closets in wood, glass, or aluminum-framed glass.
- Bathroom furnishings in wood, stone, and other materials, including shower enclosures.
- Custom living and bedroom furniture in wood, metal, and natural stone.
- Upholstered furniture: beds, fixed and modular sofas, chairs, stools, benches, and poufs — for indoor and outdoor use.
- Curtains and soft furnishings.
- Lighting decor (table lamps, chandeliers, floor lamps).
- Tableware.
- Rugs and carpets.
- Outdoor furniture.
- Parchment furnishings, also suitable for the yachting sector.
- Parquet flooring, including installation and bespoke inlaid parquet on pre-finished and pre-assembled supports.
- Natural stone wall and floor coverings, including installation and polishing.
